

UML Diagram of Calculator

calculator

given no attributes since
a calc never stores number,
it works on whatever
provided

- + calc add(double, double)
- + add(double...) args
- + Subtract(double, double)
- + multiply(double, double)
- + divide(double, double)
- + modulus(double, double)
- + Power(double, double)
- + average(double...)
- + maximum(double...)

* they all use double
data type
